ABSTRACT

A supplement to eight previous bibliographies, the present bibliography cites the latest research findings and/or educational developments in Mexican American education. Part I contains 227 citations which appeared in the June 1977 through June 1978 issues of "Resources in Education" (RIE). Part II contains 127 annotated journal article citations which appeared in "Current Index to Journals in Education" (CIJE) from June 1977 through June 1978. Entries are arranged by ERIC accession numbers (ED numbers for RIE and EJ numbers for CIJE), starting with the lowest number first. Heading each section is a subject index which will aid the reader in locating citations pertaining to a given subject area. Among the topics covered are academic achievement, bilingual education, bilingualism, career education, counseling programs, court litigation, cultural background, cultural differences, demography, educational problems and programs, English as a Second Language, handicapped students, higher education, language development, library services, literature, mental health, political power, senior citizens, testing, women, health care, and school integration. Also included are a list of the previous eight bibliographies, ordering information, and a list of the ERIC (Educational Resources Information Center) clearinghouses and their respective scopes. THE ERIC SYSTEM

The Educational Resources Information Center (ERIC) is a decentralized nationwide network, sponsored by the National Institute of Education (NIE), designed to collect, to organize, to screen, to disseminate and/or otherwise to make available educational resource and/or research related material to teachers, administrators, researchers, students, and other interested persons.

To achieve this purpose, ERIC processes documents for announcement in Resources in Education (RIE). This is a monthly abstract journal which announces all documents that are required by ERIC and that pass its selection criteria. ERIC attempts comprehensive coverage of recently completed significant documents dealing with education.

Documents announced in RIE (except for some copyrighted materials) can be purchased in microfiche or paper copy from the ERIC Document Reproduction Service (EDRS). EDRS sends complete sets of ERIC documents on microfiche to over 650 standing order customers in this country and abroad. A list containing the locations of these standing orders may be obtained from the ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 303, Bethesda, MD 20014.

In addition to providing access to the report literature, ERIC compiles the Current Index to Journals in Education (CIJE), a monthly journal which announces articles appearing in over 700 educationally related periodicals.

Although RIE and CIJE provide manual access to materials, the ERIC data base is also accessible at many locations through computer searches of ERIC's magnetic tapes. The major vendors of on-line retrieval services all provide access to the ERIC data base, which is one of the most popular and lowest cost data bases presently in operation.

ERIC accomplishes its objectives primarily through its three subcontractors and its sixteen Clearinghouses, each of which specializes in different, multi-discipline, educational areas. The Clearinghouse on Rural Education and Small Schools (CRESS) is responsible for processing materials related to rural education, small schools, the American Indian, the Mexican American, the migrant, and outdoor education. For information concerning other individual Clearinghouses and their scopes, consult the list at the back of this publication.

Organization of the Bibliography

This bibliography is the ninth such Mexican American bibliography covering the latest research findings and/or educational developments drawn from the RIE and CIJE issues dating from June 1977 through June 1978. To compile this bibliography the terms Mexican Americans, Mexican American History, Spanish Speaking, and Spanish Americans were used to search the ERIC holdings.

There are two major divisions in the bibliography: the RIE and CIJE sections. Heading each division is a subject index which will aid the reader in locating the material he wants by subject classification.

Each citation begins with an ERIC accession number. RIE entries are given an ED number; CIJE entries have an EJ number. The citations are arranged by these numbers, starting with the lowest number first.

The reader may find a Sample RIE Citation and the Key to the Citations before the citations. This will explain the code being used. The CIJE section also carries a Sample CIJE citation and its Key.

Full reproductions of each RIE document (if available) can be ordered from EDRS through the order blank found in this bibliography. This also includes instructions for computing the price. If an RIE citation says NOT AVAILABLE FROM EDRS, an alternative source is given; if the citation says HC NOT AVAILABLE FROM EDRS, the citation is available in microfiche only.

CIJE articles are not available from EDRS; to find it in its entirety or obtain a reprint, the reader must go to the appropriate journal in his local library. Many journals have reprints available through University Microfilms. See a current issue of CIJE for an up-to-date list of participating journals and for ordering information.

AB  - Mexican-American and Anglo-American children from a semirural
      low-income elementary school were tested for competition,
      individualism, field independence, and school achievement. The
      Mexican-American children were found to be more prosocial and
      less competitive, but these factors were not necessarily related
      to lower school achievement. (GDC)
